- Latest developments in education and training in radiation protection
- Education and training needs of young professionals working in radiation protection
- Long term impact of education and training in radiation protection and its sustainability
 - Training needs analysis in different sectors (nuclear industry, healthcare, NORM, ...)
- Methodology of risk communication - ethics of education and training, trainer responsibilities
- Tools and resources, methodology of training (forms of learning, approaches with different audiences and sectors)
- Need for qualification, certification and accreditation
 - For trainers, regulatory requirements, courses, ...
- Collaborations, networks and platforms: activities and achievements
- Integration of social sciences and humanities in radiation protection education and training
- Outreach activities:
 - Radiation protection information to stakeholders, pupils and the public
 - How to attract the young generation
 - Informed decision making
 - Transfer of know-how
