
China Society of Radiation Protection-Youth Committee (CSRP-YC), as one branch of CSRP and affiliation of China Institute for Radiation Protection (CIRP), was established on November 14, 2018. Under the leadership of CSRP, Youth Committee is dedicated to organizing young professionals engaged in radiation protection to conduct business exchanges and academic activities at home and abroad, recognizing and cultivating young professionals and administrators as well as providing opportunities for their development and growth.

The first committee of Youth Committee consists of 73 members, including 19 standing members, who are mainly from more than 50 domestic radiation protection related units, such as research institutes and design institutes, colleges and universities, nuclear safety supervision departments, nuclear facilities operating units, etc.

Leadership of the first committee (Elected):

Chairman: Dr. Liu Liye, Vice President of China Institute for Radiation Protection;

Vice Chairman: Dr. Luo Zhiping, China Institute of Atomic Energy;
Dr. Qiu Rui, Tsinghua University.

On November 14, 2018, the ceremony for the establishment of the Youth Committee and the first standing committee meeting of Youth Commission were held in Guangzhou, China. The themed event of "Stories of Predecessors" was organized on the morning of November 15, introducing stories of three Chinese predecessors in the field of radiation protection, namely Wei Lvxin, Zhang Yongxing and Zhang Yansheng. This activity aims at enhancing the professional identity of young radiation protection workers as well as cohesiveness of Youth Committee through listening to outstanding predecessors' stories.

Upon its establishment, letters were sent by Professor Roger Coates, President of the International Radiation Protection Association (IRPA) and Dr. Sylvain Adresz, Chairman of the International Radiation Protection Association- Young Generation Network (IRPA YGN) to congratulate the founding of the Youth

Committee. The Youth Committee appointed Vice Chairman Qiu Rui as a representative to join the leadership committee of IRPA YGN.

On May 9, 2019, the second standing committee meeting of the Youth Committee was held in Beijing to discuss and deploy future working steps:

First, a Radiation Protection Youth Forum will be held on the platform of the International Symposium on Radiation Safety and Detection Technology (ISORD-10), and young representatives from Japan, South Korea, Vietnam and other countries will be invited to attend the meeting and give talks;

Second, the second "Stories of Predecessors", will be organized on the platform provided by CSRP 2019 Annual Meeting. Experts with high reputation in the field will be invited to tell the story of the predecessors in radiation protection.

Third, Youth Committee will actively participate in the exchanges organized by international radiation protection youth academic organizations such as IRPA-YGN.

Last, the Youth Committee plans to organize a team of young experts and explore to provide free expert consultation services.
