

NORM MANAGEMENT CONFERENCE – Vienna

30 March 2027: Training Course & Executive Roundtable

31 March – 2 April 2027: 3 Days Main Conference

Location: Vienna International Centre (VIC), IAEA HQ

About the event:

Organised by Informa, with the **European NORM Association (ENA)** as scientific leading organisation and in cooperation with **the International Atomic Energy Agency (IAEA)**, the conference will provide an authoritative and neutral platform that bridges policy, science, practical solutions to industry practice.

The conference aims to reposition NORM management within the broader strategic agenda of sustainability, circular economy, and resource security. By fostering a shared vision, it seeks to move beyond a compliance-driven narrative and create a constructive dialogue on how safe and responsible NORM management can unlock economic value, reduce long-term liabilities, and contribute to more resource-efficient industrial systems.

By bringing together key stakeholders from responsible sectors, the conference will promote the identification of viable pathways for beneficial use of NORM residues, stimulate innovation, and highlight investment opportunities along with safe management and disposal of NORM.

A general guide to the VIC is available [here](#) and a map is available [here](#). Meeting participants are strongly encouraged to use [public transportation](#) to travel to the VIC.

Event Schedule:

The preliminary programme can be found on the [conference website](#) under “Agenda”. This will be continually updated, participants are informed they should continue to check the page up until the start of and throughout the event, for necessary updates.

Registration and Fees:

All participants must register via the [conference website](#).
